

# MCCULLOCH DR10

The McCulloch DR10 Ute/Trailer Mount Auger Rig is a high-mobility drilling solution designed to deliver professional grade power in a compact, vehicle-integrated package. Driven by a high performance engine and hydraulics, the system provides the reliable torque and pull back necessary for demanding soil conditions and geotechnical tasks. The inclusion of an integrated winch and mechanical chain feed simplifies material handling, significantly reducing manual labor while increasing onsite efficiency.

## Standard Specifications

|                  |                                     |
|------------------|-------------------------------------|
| Pull Back        | 2000KG                              |
| Engine           | Kohler CH940 32HP Petrol            |
| Hydraulics       | Rexroth Pump & Danfoss Valving      |
| Rotation         | Digga PDx2 High-Torque Auger Drive  |
| Rotation Speed   | 100-105RPM                          |
| Winch            | Pullmaster PL1 Winch (set at 300KG) |
| E-Stop           | On Control Panel                    |
| Throttle Control | On Control Panel                    |

## Optional Extras

- McCulloch Hydraulic SPT Hammer
- Safety Cage Interlock
- Fitment (vehicle specific)
- Jack Legs (vehicle specific)
